## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-6 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art neither anticipates nor make obvious applicant's claimed invention. While bullet sizing and lubricating devices are well known in the art, there does not appear to be a disclosure in which a lubricant containing member comprises a central sleeve with a central bore coaxial with the sizing die insert bore and having at least one opening allowing fluid communication between the sleeve bore and a lubricant container. The closest prior art, U.S. 4462298 issued to Engles discloses a bullet sizing and lubricating device comprising: a generally cylindrical sizing die member 03 having a bore of pre-determined internal diameter; a bullet lubricating assembly comprising a piston 19, a lubricating containment member 02 within which is formed a chamber having an open end, a central sleeve 17 having a central bore. However, even in the embodiment of Fig. 3 and 6, the sleeve is not coaxial with the sizing die insert bore nor is the piston actuated by interaction with the sizing die member.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art cited on form PTO-892 are cited as of interest to show similar bullet sizing and lubricating devices.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Troy Chambers whose telephone number is (703) 308-5870.
